These Copper Caddy™ Testimonials are just a couple of the many comments received since its introduction in 2014.

"I have purchased several Copper Caddy's to store copper in my shop and trucks. The Copper Caddy fits behind the passenger seat in my sprinter van. It keeps the copper rolls from rattling and I can look over and always know what I have in my van. I plan on purchasing more Copper Caddy's when outfitting my new trucks. "

Scott Kluckhuhn - Laurel Fuel Oil Heating & Air Conditioning

"I've had the Copper Caddy™ mounted on the rear door of my work van for 2 years now. I could not imagine if I didn't have it! I always know how much of each size I have left because I see easily see each roll. No more going to the truck and grabbing the copper only to see that it's damaged in several spots. Something that HVAC technicians have needed for a very long time, finally its available."

Mark Ashby - ASC Corp
